About me

Passionate individual with a strong knowledge and experience in many startup-related areas such as full stack web development, business strategy, business intelligence and financial analysis. The traits I value the most on me are my teamwork skills, creativity, hunger for knowledge and innovation, ability to quickly learn anything, analytical skills, constant professional and personal growth and a huge desire to make a difference. After finishing an intensive coding bootcamp and rediscovering my passion and talent in programming, I am looking to go all-in and become a full stack developer at an impactful startup, while bringing many other business-related baggage and distinctive soft skills.

Programming

Main Skills: Ruby on Rails, Javascript ES2016 & Vue.js, Responsive web design, REST APIs, Relational databases (SQLite & PostgreSQL), work-flow with GIT, OOP, TDD, Machine Learning

Le Wagon Full stack Programming Bootcamp, Sao Paulo Batch #182

Sep – Nov 2018

9-week intensive coding bootcamp. Completed 500+ programming challenges and launched several web applications, including a marketplace-based online game (spacewagonsrace.herokuapp.com) and a movie recommendation system (every-thing.me).
